

2021 LANDSCAPE

Landscape Ferns

 Landscape  Table Top  Basket  Deciduous

Hearts Tongue Fern

 9-25
cm

Asplenium scolopendrium

An easy to grow, beautiful evergreen fern who's fronds unfurl like a tongue. Make a dense growing, apple green mound perfect for pot plant, basket or landscape use. Very hardy but best to avoid intense heat and humidity in northern climates over summer.

Silver Lady

 14-30
cm

Blechnum gibbum 'Silver Lady'

Hardy and fast grower which adds a tropical touch to any garden or landscape.

Volcano

 14-30
cm

Blechnum brasiliense 'Volcano'

An elegant new selection which produces bright red new, toothed fronds, maturing to mid green and has an erect, upright habit.

Australian
Native

Rough Ruby

9-18
cm

Doodia aspera 'Rough Ruby'

An east coast native from VIC-QLD. This new selection has lovely deep red new growth and a refined, compact and clumping habit. Evergreen and perfect for landscape or pot plant sales.

Cretan Brake Fern

9-20
cm

Pteris cretica 'Rowerii'

A tufted, upright growing fern with long, pinnately divided fronds. Perfect for pots and larger containers.

Button Fern

8-25
cm

Pellaea rotundifolia

This cute little fern produces soft, small deep green rounded leaflets on gracefully arching stems. A tough fern that makes a wonderful indoor or container plant.

Korean Rock Fern

 9-20
cm

Polystichum tsus-simense

A very easy to grow, evergreen and widely tolerant fern with deep green-almost purple at times-foliage with delicate lace like fronds. Makes a wonderful indoor plant used in pots or baskets, it is also exceptionally heat and cold tolerant; down to minus 20°C, making it perfect for landscape use.

Dwarf Japanese Holly Fern

 9-25
cm

Cyrtomium falcatum 'Maritimum'

A distinctive, shade loving fern, with a long, glossy fronds and a dense clumping habit. More tolerant of a range of humidity and extremely hardy. This fern is perfect for landscape use or indoors.

Hello, we are compact, low maintenance and versatile shrubs, ready for a range of uses around your house!

We can be used as flowering hedges, in containers or in beds, although we prefer to be placed in a spot we can thrive in for years to come.

We prefer full sun and are tolerant of frost.

Lagerstroemia

Babe, Eternal & Kiss

 14-20 cm  1.2-1.5 m

These compact shrubs flower abundantly from late spring until late summer. Reaching only 80cm tall with a well branched habit these new Crepe Myrtles make wonderful patio or garden plants or a flowering hedge.

Kiss
Lagerstroemia indica 'Milarosso' (b)

Eternal
Lagerstroemia indica 'Milavio' (b)

Babe
Lagerstroemia indica 'Milapearl' (b)

Eternal, Kiss & Babe
Trial Garden, Peats Ridge, NSW, Jan 2021

Hebe

Black Satin

 14-30
cm

Hebe hybrid 'tull304' ♂

A beautiful, compact and well branched variety with glossy, satin-like deep coloured foliage. The new growth starts out deep green and will turn black as it matures, which contrasts with bright pink flowers in Spring.

A very tough variety which has had no issue with handling extremely heat and humidity, with no disease problems recorded.

The variety works well planted into the garden, in patio pots or as a landscape item.

Dress in an electric pink pot to catch the eye!

Hebe Black Satin
Trial Garden, Peats Ridge, NSW, Jun 2020

DESIGN EDGE®

Design Edge® is a fashionable group of plants that are reliable, low maintenance and provide style and colour to outdoor areas all year round.

Use the Design Edge® varieties to create Mediterranean, tropical and formal styled gardens. These varieties complement all garden styles for a relaxed and stylish look.

Abelia

Magic Daydream^{PBRe} & Lucky Lots

14-30
cm

Self Propagation
Licence Available

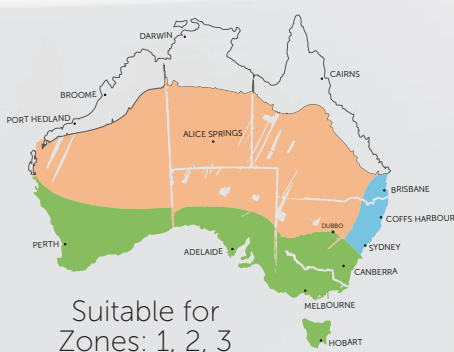

These tough, hardy and low maintenance varieties are a great addition to your shrub range. Both varieties have compact, dense mounding habits and offer fantastic colour throughout the year. Magic Daydream offers bright green and white variegation with flashes of pink during new growth and over winter. The flowers are pink. Lucky lots has a silver appearance with white flowers and a slightly more vigorous habit.

Magic Daydream^{PBRe}
Abelia

Lucky Lots
Abelia

Ilex

Tall, Dark & Handsome

 14-30
cm

Ilex x meservae 'Heckenblau'

Tall, Dark & Handsome is a fast growing upright Ilex reaching around 150cm tall. This extremely hardy shrub offers beautiful structure and colour throughout the year.

New growth is a deep red colour which matures to deep green-purple for the remainder of the year.

Fully evergreen and works well for a 14cm to 30cm pot either as a single specimen or use for hedging.

Loropetalum

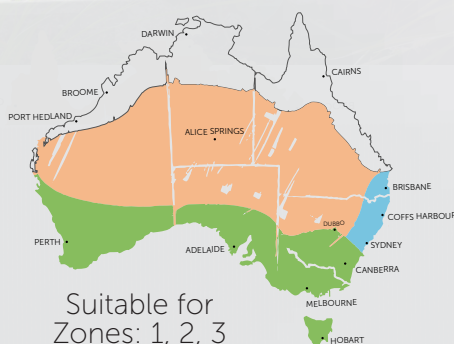

Ruby Snow

 14-30
cm  Self Propagation
Licence Available

Loropetalum 'Iwai' ♂

Ruby Snow has a unique combination of foliage and flower. The new foliage emerges deep red which develops to dark burgundy purple with contrasting white flowers which appear in abundance throughout Spring.

Ruby Snow has a layered, mounding habit and will reach about 70 cm tall and 40 cm wide. This low maintenance, heat and sun tolerant variety is perfect for patio pots, containers and the landscape.

Podocarpus Mood Ring & Roman Candles

14-30
cm

Self Propagation
Licence Available

Full
Sun

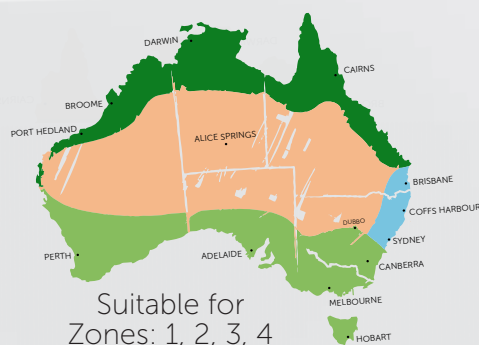

These are tough, low maintenance upright shrubs, offering pest and disease resistance. They tolerate poor soil conditions, full sun, heat and humidity. Evergreen, with an upright habit, they work very well as a privacy screen or an accent.

Mood Ring
Podocarpus 'Sosa' (b)

Roman Candles
Podocarpus 'Miu' (b)

DESIGN EDGE®

Viburnum Coppertop

 14-40
cm

Viburnum odoratissimum 'Brant01' ♂

Viburnum Coppertop is an exciting new low maintenance evergreen hedging plant producing bright maroon-red new shoots which provides added interest to your landscape.

Aswell as the distinctively coloured new growth, which will appear after every trim, Coppertop is blessed with glossy foliage and a bushy, well branched habit. This new Sweet Viburnum will also provide fragrant, creamy white flowers and small red berries.

Coppertop thrives in full sun to part shade and is heat and drought resistant, working well across all areas of Australia. It is a quick growing variety that is suited to 14cm to 35cm production, just like normal *odoratissimum*. The final height and width of Coppertop is a well refined 2.5m x 2m.

2021

Nandina Gulf Stream

 14-30
cm

Nandina domestica 'Gulf Stream'

Nandina Gulf Stream is a plant well suited to urban conditions. Unlike alternate varieties Gulf Stream is bushy and compact, providing year round foliage interest.

Suitable for
Zones: 1, 2, 3, 4

Agapanthus

Poppin' Purple

 14-20 cm  50-60 cm

Agapanthus africanus 'SDB002' ♂

Poppin' Purple has bold, true purple flowers on stems approximately 60cm tall. The variety produces a large number of flowers per head plus a high flower stem quantity.

It is also very early flowering, expect intermittent flowers across the Summer until March after the first big flush in August.

Fully evergreen across Australia with short, broad foliage, Poppin' Purple is the easy choice growers. Produced from tissue culture for a very uniform crop.

Agapanthus

Blue Thunder

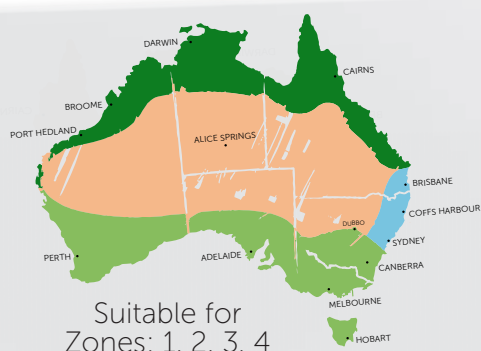

Agapanthus africanus 'SDB002' ♂

Blue Thunder produces beautiful deep blue flowers on compact, sturdy upright stems reaching only 40-45cm tall.

The neat, short, strappy foliage remains fully evergreen all winter. Blue Thunder's early flowering and very high flower production rate makes it a very grower friendly choice. Produced from tissue culture for a very uniform crop.

The breeder, Quinton Bean, with his new creation 'Blue Thunder'.

Agapanthus

Fireworks

14-20
cm

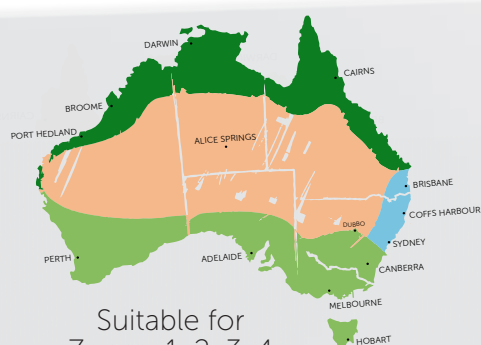

60-70
cm

Agapanthus africanus 'MDB001' ♂

The first fully evergreen, re-blooming bi-colour Agapanthus on the market. Fireworks produces large sized umbels with pendulous florets on stems around 70cm tall in significant volume.

The short, neat foliage make this a great pot plant. It's leaves remain green all winter, minimising any clean up prior to sale. Produced from tissue culture for a very uniform crop.

Suitable for
Zones: 1, 2, 3, 4

Agapanthus

Zambezi

14-20
cm

60-70
cm

Self Propagation
Licence Available

Agapanthus africanus 'KEK5006' ♂

A striking new broad leaved, vigorous variety with bright green and creamy yellow variegated stripes. A bold grower making a large clump, this variety works perfectly in part or full shade.

Long lasting violet flowers are produced at the start of December for a remarkable display.

Variegated
Foliage

Agapanthus Zambezi
Royal Botanic Gardens, Sydney, NSW, 2020

Cordyline Fantasy™

Cordyline australis 'SPRICORFANTASY' ♂

The striking leaves of Cordyline Fantasy™ combined with statuesque appearance provide a dramatic visual effect all year round. The clean green and cream variegated foliage provides a bright contrast to dark landscape areas.

Their long upright pointed leaves allow you to create great effects in Mediterranean, tropical and formal styled gardens. Fantasy™ gives a fresh clean modern look perfect for both residential and commercial projects.

Carex

Everoro

Carex oshimensis 'Everoro' (b)

Everoro provides a colourful solution in small and large outdoor spaces as it brightens shaded or mostly green garden designs. Everoro is also ideal as a border to hard areas, for under planting around trees, or in large patio pots where the natural cascading habit is accentuated.

Everoro is a very hardy variety and tolerates dry and saturated conditions. Minimal care is required. On site testing has provided excellent results across a huge climatic area from Melbourne with dry summers to Cairns with tropical seasons.

Everillo

Carex oshimensis 'Everillo' (b)

Everillo's golden lime colouring will give a bright burst of colour to many areas. The natural cascading low growing habit makes it an easy match to co-plant with other varieties. Everillo is also ideal as a border to hard areas, for under planting around trees, or in large patio pots where its' natural cascading habit is accentuated.

Everillo is a hardy variety and tolerates dry and saturated conditions. On site testing has provided excellent results across a huge climatic area from Cairns with tropical seasons to Hobart and across to Perth.

Everest

14-30
cm

Full
Sun

Carex oshimensis 'Carfit01' (b)

Everest's refreshing green/white striped foliage and low growing cascading habit makes it an easy choice as a companion plant with other varieties. Everest is also ideal as a border to hard areas, for under planting around trees, or in large patio pots where the natural cascading habit is accentuated.

Everest is hardy to -15°C and tolerates dry and saturated conditions. On site testing has provided excellent results across a huge climatic area from Melbourne with dry Summers to Cairns in the tropics.

Everlime

14-30
cm

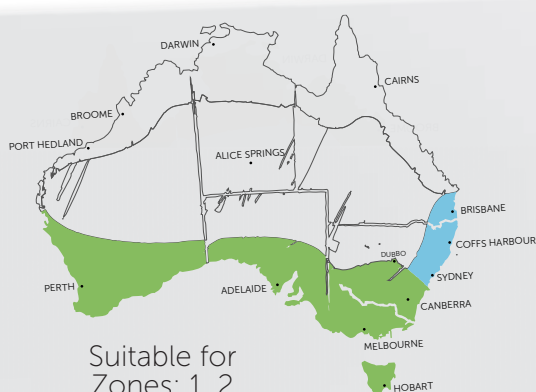

Full
Sun

Carex oshimensis 'Everlime' (b)

A bold new selection with beautiful deep green centre flanked by lime margins. Everlime is a superb ground cover and container plant with a slightly larger habit and broader bladed than other varieties. This extra vigour provides even more robustness in the landscape and tolerates heat, humidity and cold very well.

Use in container, green walls and mass plantings for low maintenance, all year round colour.

Festuca Beyond Blue™

Festuca glauca 'Casblue' (b)

Beyond Blue™ develops an attractive clump of light blue foliage, ideal for creating natural garden borders, or planting amongst low growing flowering plants.

Beyond Blue is very drought tolerant and low maintenance. Because it has stronger roots than Elijah Blue, it doesn't die back in Summer and even grows well in Queensland.

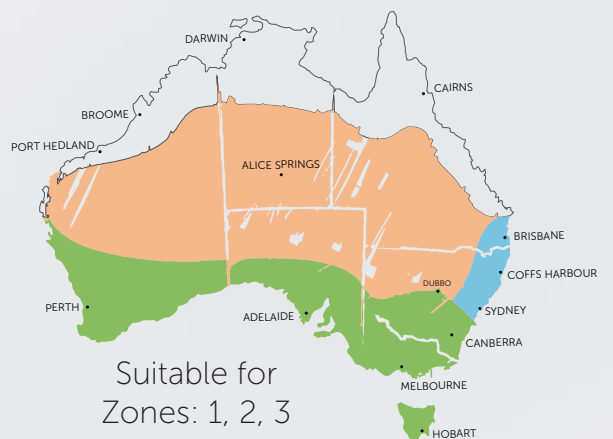

Festuca Beyond Blue™
Melbourne Flower Show, VIC, Mar 2019

Which one would you grow?

Festuca Beyond Blue™
Melbourne Flower
Show, VIC, Mar 2019

Dianella Blue Ripple™

 12-25
cm

Dianella prunina hybrid 'D51' (b)

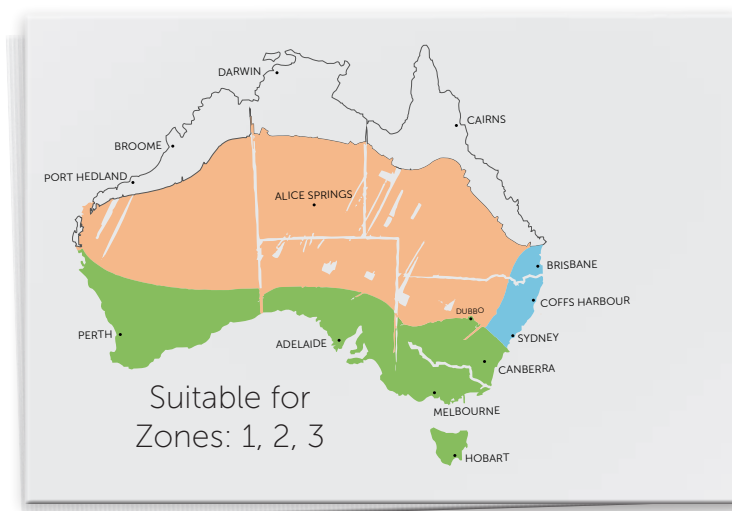

Blue Ripple is derived from a controlled pollination breeding program. Our objective was to select a more compact version of Blue Stream for smaller pot sizes. Blue Ripple™ reaches a height of approximately 30cm and has arching leaves. Arching leaves was a key attribute we were seeking as an arching canopy enables growers to produce full looking pot plants quicker.

Dianella Blue Ripple™
Sprint Showcase, VIC, 2019

Dianella Blue Ripple™
Royal Botanic Gardens, Sydney, NSW, 2020

Dianella

Blue Stream™

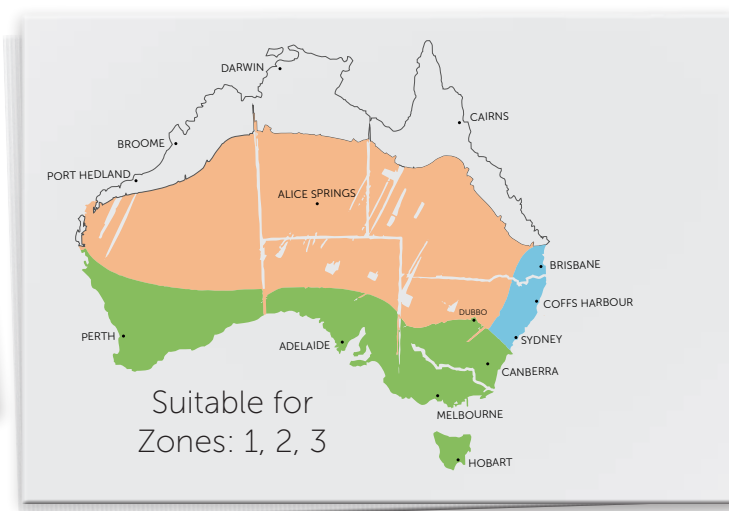

Dianella hybrid 'ProquestD5' (b)

Blue Stream™ offers the landscape designer a blue/green swathe of colour, an ideal addition or alternative to the 'green' landscape. This vigorous variety quickly forms a dense clump, producing many side shoots that emerge from around the plant base. The overall appearance is a glauca (blue/green) tuft.

Blue Stream™ is perfect for courtyards, garden plantings amongst low growing flowering plants or mass planting in the landscape. Use the upright habit to create natural garden borders or to add height in a large patio pot display.

Suitable for both sun and shade. Blue Stream does prefer dry summers. It can also be grown where wet summers normally prevail but in these wet zones it may need to be pruned at the end of summer to remove old foliage. During the Autumn and Winter new foliage will develop.

Dianella Streetscape™

Dianella hybrid 'Proquest D3' (b)

When the job requires a good looking tough Dianella that tolerates all conditions from dry heat to high humidity then the first variety on the planting list needs to be Streetscape™ - a tougher Australian grass.

Developed by NuFlora in Sydney, Australia, Streetscape is the result of crossing a Cape York Dianella species with *Dianella caerulea*. The geographical tolerances of the parent species are inbuilt in Streetscape enabling it to cope with a wider range of temperature and humidity than seen in existing Dianellas.

Visually Streetscape offers a great looking dense plume of strappy foliage. A great understory plant, brilliant for low mass plantings. Its roots grow at twice the speed of *Dianella caerulea* so it establishes quickly after planting.

Dianella Streetscape™
Shoalhaven, NSW

Dianella Explorer™

 14-30
cm

Dianella caerulea 'Explorer'

Explorer™ develops a strong and spreading undergroup root system that makes this variety an excellent choice when selecting plants for revegetation or for stabilizing embankments. Each plant has the potential to spread 90cm in diameter.

Above ground the upright pluming habit of broad mid green leaves creates a verdant green 'scape' in landscapes, under trees or beside paved areas. In mid to late spring a multitude of blue coloured berries provides a spectacular display just above the foliage.

Explorer is a very hardy, drought tolerant Australian Dianella variety. It prefers a full sun to part shade location.

Dianella Coolvista™

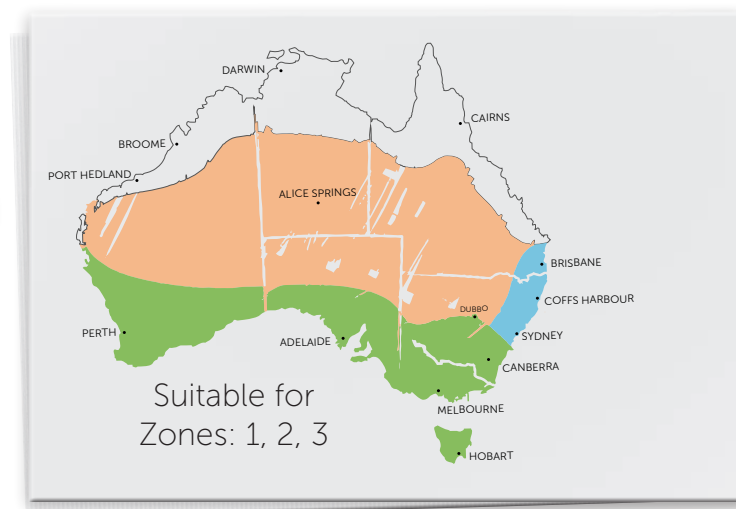

Dianella revoluta 'Allyn-Citation' (b)

Coolvista™ offers the landscape designer a grey-green swathe of colour in a stiff upright texture.

This vigorous variety quickly forms a dense clump, producing many side shoots that emerge from around the plant base. The overall appearance is a grey-green tuft.

Coolvista is particularly suited to climate zone 1 with dry summers. It can also be grown in zones 2 and 4 where wet Summers normally prevail but in these wet zones it may need to be pruned at the end of Summer to remove old foliage. During the Summer, Autumn and Winter new foliage will develop.

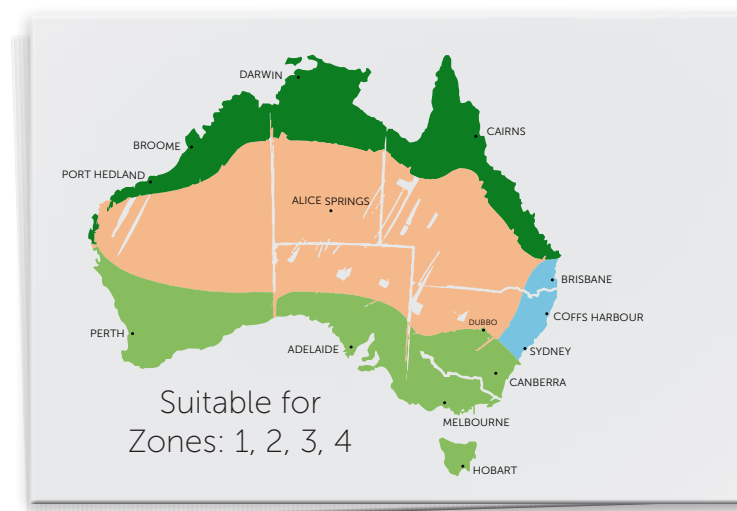

Liriope Mini Mauve

Liriope muscari 'Suncap5' (b)

A new compact, clumping alternative to Evergreen Giant that retains spotless evergreen, deep glossy green foliage all through the year. Therefore Mini Mauve requires much less maintenance throughout the year. It is highly uniform, compact in size and tolerant of full sun and frost.

Light mauve flowers appear on short flower stems just above the foliage level towards the end of Summer.

Lomandra

LOWVISTA™

Lomandra confertifolia 'SPRILOMANCE' (b)

LOWVISTA™ is a new compact variety with deep lime, fine foliage and a compact, dense and tight growing habit. Reaching approximately 40-60cm high and wide, this variety is perfect for landscape planting where a lower sightline is required.

Typical of the species, this variety is very tolerant of sun, heat and drought and very uniform and vigorous in production. It compliments its bigger brother TROJAN™ very well, where a shorter and more rounded variety is required.

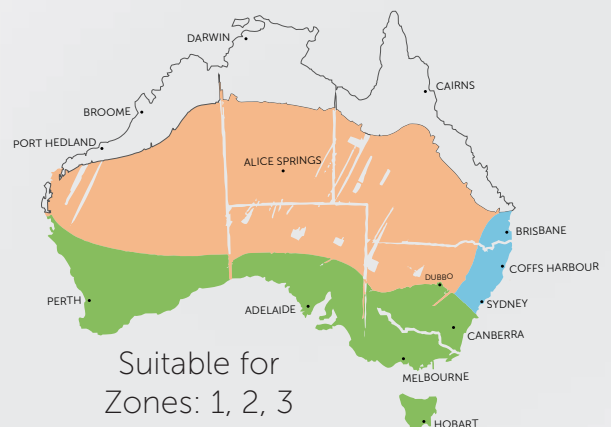

NEW

Lomandra LOWVISTA™
Trial Garden, Peats Ridge, NSW, 2021

BEST FOR
KERBSIDE
PLANTING

Lomandra

Trojan™

 14-30
cm

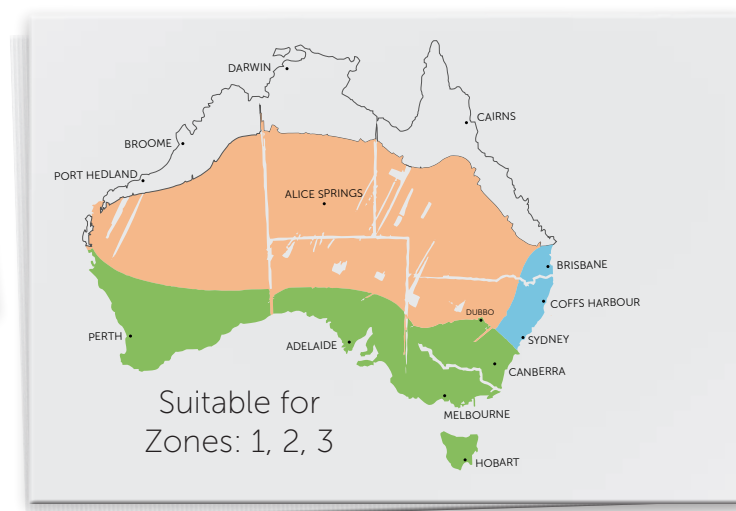

Lomandra confertifolia ssp. *palladia*
'SPRILOMJAN' (P)

Trojan™ is a new hardy, drought tolerant *Lomandra confertifolia* variety. Trojan has an extremely dense, upright habit creating a neat oval shape with clean lime green fine foliage. Highly tolerant of heat and humidity, with good performance for a wide range of Australian conditions.

The variety is extremely stable and uniform in production and due to its vigour and habit, a low dropout rate and pot tight growing conditions can be utilised. Grows up to 80cm high and 40cm wide.

Lomandra Trojan™
Trial Garden, Peats Ridge, NSW, 2021

Lomandra Crackerjack™

 14-30
cm

Lomandra confertifolia rubiginosa
'Merlom Ruby' (b)

Crackerjack™ is an Australian grass that exhibits a strong, yet graceful presence in the landscape. Its fine leaves hide the effects of any leaf tips drying out, caused by low rainfall in summer periods. This ensures a fresh appearance is maintained year round.

Crackerjack has become popular in softening hard landscapes. The fine leaves of Crackerjack sway gracefully in the wind and create the feeling of a soft flimsy element, contrasting perfectly with hard paved surfaces.

Crackerjack's new leaves emerge blue and mature to green with age. Because its flowers are positioned deep in the foliage it is well suited to high pedestrian areas as there is very little danger from getting spiked by drying flowers.

Lomandra

Ocean™

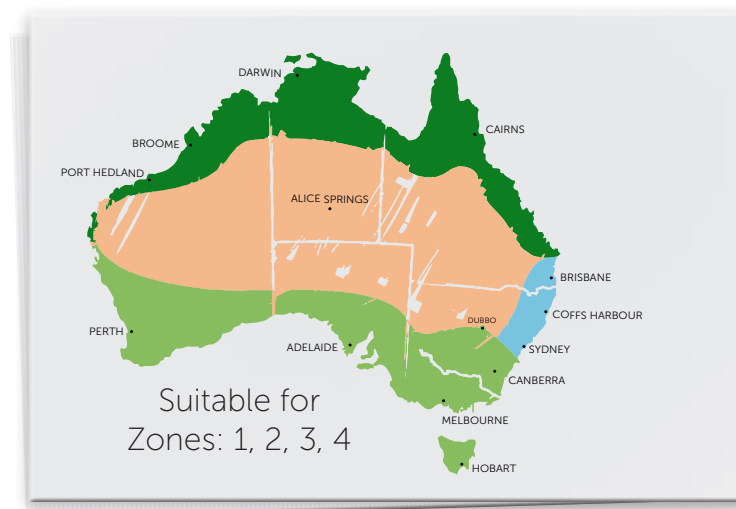

Lomandra confertifolia ssp. *palladia*
'SPRILOMEAN' (b)

Ocean has a dense, upright habit reaching around 80cm tall with glaucous blue-green foliage that remains very clean throughout the entire year. Ocean retains its blue hue all through the year, although will benefit from a yearly cut back, this is not essential.

Small blue flowers are held within the foliage out of sight, keeping Ocean's appearance very tidy. Ocean is very tolerant of extreme heat, frost and drought and is a quicker and easier to grow alternative of blue-green longifolia.

Lomandra Ocean
Trial Garden, Peats Ridge, NSW, 2019

Lomandra

TropiTM

14-30
cm

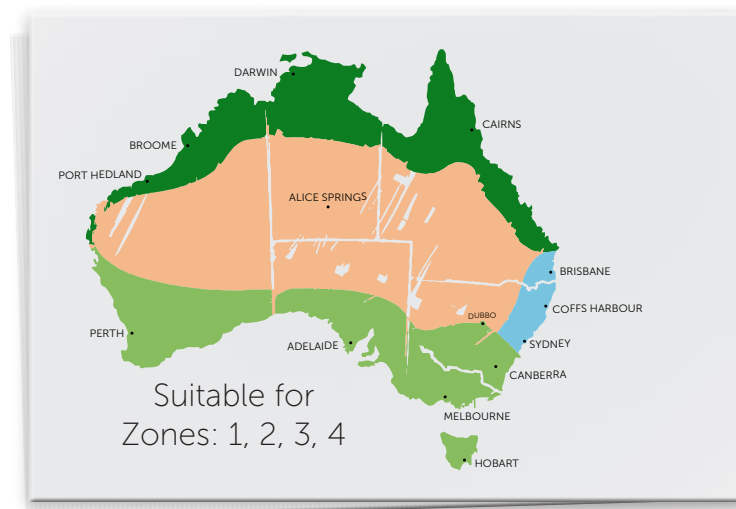

Lomandra hysterix 'SPRILOMOOL'

A new, more compact selection of the native broad leaf species reaching approximately 80cm tall and 80cm wide. It was selected for its clean growing foliage which doesn't burn or yellow in Winter along with a gently arching to weeping habit.

TropiTM is an extremely tough and vigorous grower which will tolerate waterlogged or dry conditions. It will produce yellow flowers that stand just above the foliage height. Great when used in a landscape for mass planting, edging and as spot planting.

Lomandra TropiTM
Royal Botanic Gardens, Sydney, NSW, 2020

Lomandra

Blue Ridge

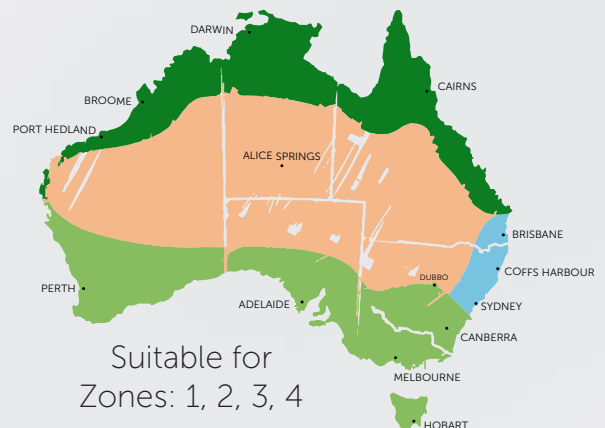

Lomandra glauca 'Blue Ridge'

The most distinctive feature of Blue Ridge™ is its powder blue leaves. New seasons leaves are a beautiful powder blue that darken to green as they mature. From the 2nd season onwards a mixture of blue and green leaves will be present. Blue Ridge is extra tough in hot and cold areas.

This Australian grass is hardy and drought tolerant. Blue Ridge is suitable for residential gardens and commercial projects. It grows best in free draining soils and will tolerate dry sandy soil conditions.

Lomandra Blue Ridge
VIC, 2019

Yucca

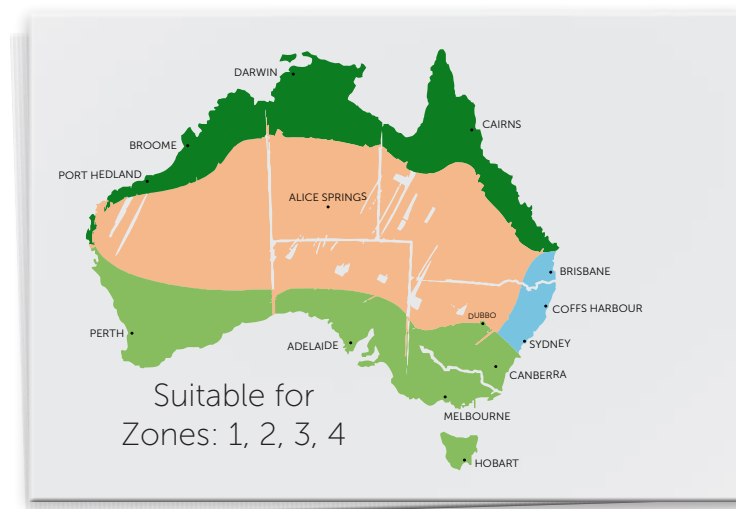

Citrus Twist™

 14-20
cm

Yucca gloriosa 'Z13'

Eye catching new Yucca gloriosa 'Citrus Twist', with slightly twisted bright yellow and mint green foliage that turns bright pink to red over winter in cool weather.

Sun, heat and drought tolerant. Citrus Twist makes an excellent patio or garden plant.

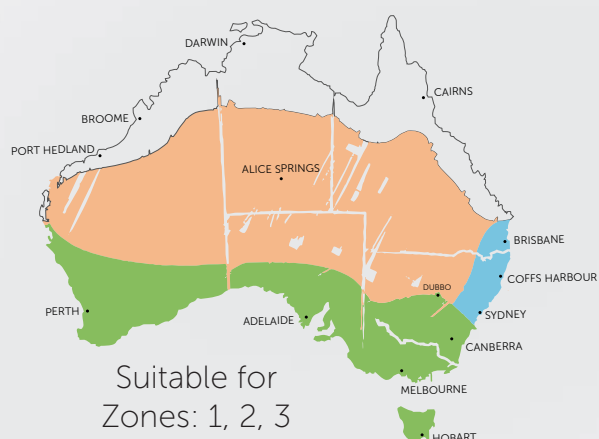

Cordyline Electric Flash™

 18-20
cm

Cordyline banksii 'SPRILECFLASH' (b)

Electric Flash™ offers a distinct colour difference to Electric Pink™ and Electric Star™. Its cream and chocolate coloured leaves offer easy blending into landscapes.

We suggest planting it in a position where it can be backlit with morning or afternoon sun. The variegated leaves then become a stunning feature as the sun 'lights up' the foliage.

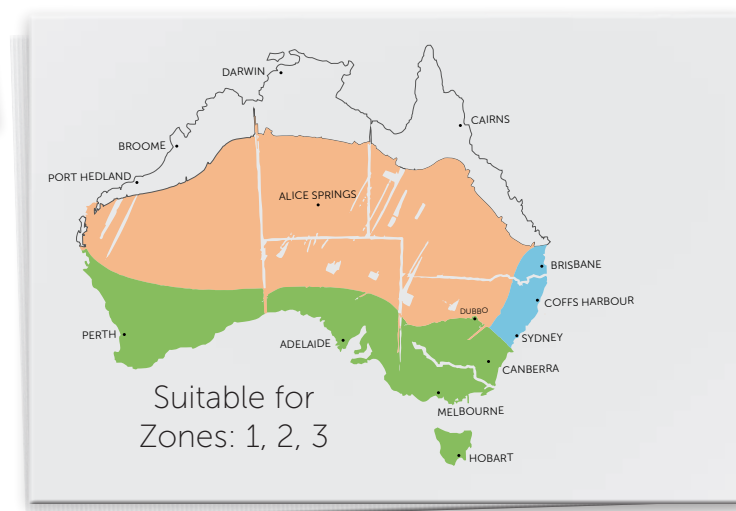

Cordyline Electric Star™

 18-20
cm

Cordyline banksii 'SPRILECSTAR' (b)

Following in the 'Electric' style, Electric Star™ is a compact, clump forming Cordyline that doesn't develop a bare single stemmed trunk. Instead it develops side shoots that together with its slightly arching leaves provides a denser foliage plant.

Residential and commercial gardeners will love Electric Star's™ bright green and burgundy striped leaves. It will be easy to incorporate into large commercial plantings because of its predominant green colour. Up close, its burgundy stripes are easily recognised and will provide the visual appeal desired around patios, terraces and building entrances.

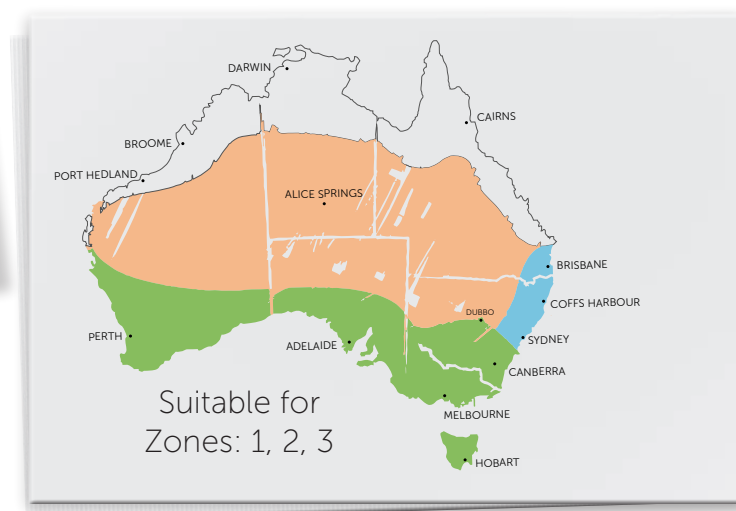

Cordyline Electric Pink™

 18-20
cm

Cordyline banksii 'SPRILECPINK' (b)

Dramatic and vibrant...no other Cordyline variety has caused such a star in the market place. The high demand for this variety is the result of residential and commercial gardeners seeking perennial plants that are colourful. But Electric Pink™ has proved to be an outstanding variety not just for its colour but also for its performance in harsh conditions. Once established this variety is extremely heat tolerant withstanding temperatures in excess of 40°C

By generating multiple shoots, Electric Pink™ quickly forms a clump of brightly coloured hot pink and purple striped foliage. The leaves are timely textured when young which broaden as the plant matures. Electric Pink™ virtually glows - an amazing eye catching variety for outdoor gardens or as a feature in large patio pots.
