Variety Specification Sheet

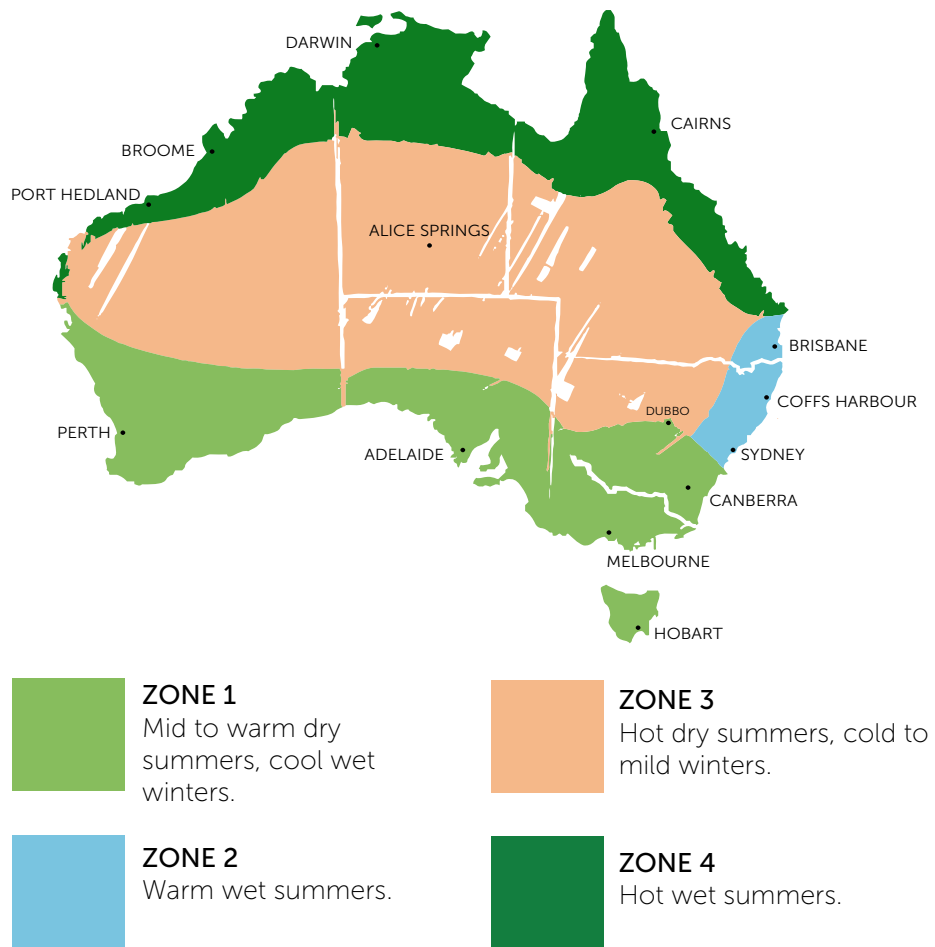

BOTANICAL NAME	VARIETY	FOLIAGE COLOUR	FLOWER COLOUR	HABIT	HEIGHT	WIDTH
Agapanthus	Black Jack	 Green	 Dark Purple	 Mound	 0.8m	 0.7m
Dieties	Milky Way	 Green/Cream	 Yellow	 Upright arching clump	 1m	 0.8m
Schizachyrium	Chameleon	 Green/White/Purple	 Purple/Red	 Upright arching clump	 1m	 0.5m

Climate Zones

Over the past years Australia has experienced some extreme weather from droughts to significant rainfall. The climatic tolerances of a variety must be measured not just according to temperature extremes, but also by seasonal rainfall patterns. The map shows four major climatic zones for the Australian continent.

As a standard, zones 2 and 4 have wet summers while zones 1 and 3 have wet winters. To assist in variety selection please review the Variety Specification Sheet, which shows the recommended zones for each variety.

SPACING	COLD TOLERANCE	SOIL TOLERANCE	CLIMATIC ZONE (Refer to map)	BEST FOR
0.7m 	to -12°C	Medium loam to light sandy	1, 2, 3, 4	Feature plant, flowering border plant. Full sun to part sun.
0.9m 	to -9°C	Medium loam to light sandy	1, 2, 3	Median strips, borders next to pathways, driveways and where low maintenance plants are a priority.
0.6m 	to -30°C	Medium loam to light sandy	1, 2, 3, 4	Contrasting colour. Garden beds, balcony planters, containers, borders next to pathways or driveways.

Agapanthus

Black Jack

 14-30
cm

70-80
cm

Winner of the Chelsea Flower Show 2023, Black Jack is a stand out variety of Agapanthus with deep purple flowers and buds that appear almost black. The plant has a vigorous habit, and is highly floriferous, producing dense umbels with a high number of inflorescences. A reblooming variety with an extended flowering period from Spring through to Autumn. Developed in South Africa, Black Jack is heat and drought tolerant.

INDOOR

Crispy Wave *Asplenium nidus*

This variation on the traditional Birds Nest Fern features stunning pleated fronds.

Suitable for indoor programs, and landscape applications in tropical areas.

Deer Fern *Blechnum spicant*

A stunning hardy fern that can tolerate temperatures as low as -25°C.

Sterile, dark green glossy leaves grow year round in a flat mounding habit, with fertile upright fronds appearing during Spring - Autumn.

Japanese Holly Fern *Cyrtomium falcatum*

Japanese Holly Fern is a an attractive variety with dark green glossy leaves and serrated edges.

Hardy to -15°C , and incredibly tolerant of dry air, this fern is an excellent addition to indoor and landscape ranges.

Japanese Holly Fern is deciduous in cold climate areas but will remain evergreen in most moderate, temperate and tropical climates.

East Indian Holly Fern *Arachnoides simplicor*

East Indian Holly Fern is a handsome fern with hand-shaped, textured fronds that are glossy green with yellow variegation.

Hardy down to -23°C , and suited up to \varnothing 25cm pot, this fern is perfect for use in landscape or indoor applications.
