## Petit™

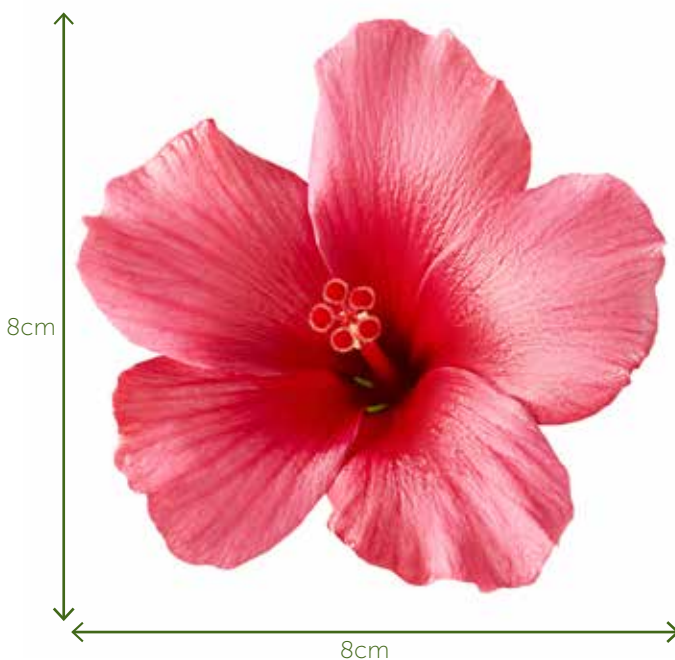

PLUG DELIVERY PERIOD: Jan – Dec

HibisQs® Petit™ is a newly developed type of Hibiscus, characterized with a lot of smaller, but beautiful flowers. The Petits are bred for the modern consumers who desire a minimalist, yet exotic look to suit their urban lifestyle, inside as well as out.

The Petit's grow into a well branched, compact plant which will be adorned in flowers within a short growing time.

HibisQs® Petit™ loves and needs light - and should therefore be placed in a bright spot, giving the HibisQs® Petit™ its daily gleam of sunshine. The HibisQ Petit's are suited for indoor and patio or garden use.

HibisQ® Petit™ was first released at IPM Essen, in Germany in January 2017, where it won the 'IPM Innovation Award 2017' in the category 'Flowering Pot Plants'. HibisQs® Petit™ was also awarded 3rd place at RHS Chelsea Flower Show 2017 in the category "Plant of the year"
