

Mandevilla

Qdeville

Mandevilla

Flamenco™

Qdeville

Our Qdeville range of Mandevilla are known for their compact growth and their lack of tendril tangling, making production easier with lower labour costs. They can also be grown on short trellis structures.

The Qdeville varieties have big, colourful buds and flowers that can withstand the harsh summer conditions in warm areas, as well as in mild climates. These plants will continue to flower beautifully until the end of the season in May.

Options for Growing

				
Pot Size	12cm	14cm	18cm	20cm
Plants	1	1	1-2	3
Pinch	1x	1-2x	2x

Qdeville

They are naturally compact varieties that are stiff and upright in their growth, eliminating the need for support.

Of particular importance is Ainia – the most popular white variety in production in the world, according to Graff Breeding, the breeders of the Qdeville range in Denmark.
