

Mandevilla

Summerstar

Summerstar™

The Summerstar™ range delivers the kind of high-impact colour and dependable performance that retailers and growers rely on through the warm season. They are bred by the Mandevilla Association in The Netherlands for exceptional branching, heavy flowering and strong garden resilience. The Summerstar™ varieties produce continuous blooms in vivid reds, pinks and whites that hold their colour beautifully in full sun.

Options for Growing

				
Pot Size	12cm	14cm	18cm	20cm
Plants	1	1	1-2	3
Pinch	1x	1-2x	2x	

Their tidy, controlled growth makes them ideal for premium pot production, while their long flowering window ensures maximum sell-through at retail. If you're planning your summer offering, Summerstar™ provides a reliable, eye-catching range that customers seek year after year.

Summerstar™

The Summerstar™ series of Mandevilla set themselves apart from other Mandevilla on the market due to their early and extended flowering nature, providing a rich profusion of flowers from late Spring until Autumn. The Summerstar are characterised by intense colours with varieties that cover themselves in blooms, borne all the way down the stems.

PLUG DELIVERY PERIOD: Aug – May

Each plug is well-rooted with strong early vigour, allowing growers to pot on quickly and achieve a full, premium plant with minimal intervention. The plugs hold their shape, branch evenly, and transition smoothly into active growth as temperatures rise, making them ideal for both small-pot and larger decorative formats.
